

--:~ field.plot() <- **Create Four Animal Pens with Central Access Alley** ->
muse/docs/fields/pen.md
--:+ *Loaded by `field.make` with operation name, span of plots for the operation, and field bounds.*
--:+ **Supported operations are `quarry`, `layer`, `finish`, `path`, and `test`**
--:+ *Calls `field.plot` with specified plot span, field operation function, and total field plots for that operation.*
--:+ *Operation functions call `field.plan` with plot bounds, xyz offset, and prototype plan for the operation.*
--:+ *Leaves margins around finished area fencing, fences quadrants with internal alley, uses "`fence`" material.*
--:+ *Gates are to be placed by player (replacing fence) as desired.*
