

--:~ field.plot() <- **Create Four Animal Pens with Central Access Alley** ->  
muse/docs/fields/pen.md  
--:+ *Loaded by `field.make` with operation name, span of plots for the operation, and field bounds.*  
--:+ **Supported operations are quarry, layer, finish, path, and test**  
--:+ *Calls `field.plot` with specified plot span, field operation function, and total field plots for that operation.*  
--:+ *Operation functions call `field.plan` with plot bounds, xyz offset, and prototype plan for the operation.*  
--:+ *Leaves margins around finished area fencing, fences quadrants with internal alley, uses "`fence`" material.*  
--:+ *Gates are to be placed by player (replacing fence) as desired.*
