

--:~ field.plot() <- **Layer Sand and Reeds, Harvest Cane Field Plots Separated by a Row of Water** -> muse/docs/fields/cane.md

--:+ *Loaded by `field.make` with operation name, span of plots for the operation, and field bounds.*

--:+ **Supported operations are quarry, layer, cover, finish, harvest, path, and test**

--:+ *Calls `field.plot` with specified plot span, field operation function, and number of operation plots.*

--:+ *Operation functions call `field.plan` with plot bounds, xyz offset, and prototype plan for the operation.*
